PROJECTS

License Plate Detection and Recognition GitHub
A real-time system for detecting and recognizing vehicle license plates.

- Developed a real-time license plate detection and recognition system using YOLOv8 and Tesseract OCR to accurately detect and extract vehicle plate information, including fast-moving and damaged plates under varying lighting conditions.

ChitLink Messenger: A Socially Integrated Platform GitHub
A real-time messaging platform with integrated social communication features.

- Developed a socially integrated messaging platform with real-time communication, user authentication, interactive chat features, and a responsive user-friendly interface to enhance seamless interaction and user engagement.

Smart College Management and Automation System *Oct 2025*
A centralized college automation system for managing academic and administrative services efficiently.

- Developed a centralized college automation system on the ServiceNow platform to manage admissions, faculty, hostel, transport, and mess services by automating administrative workflows and providing a user-friendly interface for students and staff.

INTERNSHIP

Junior Web Development Intern *Feb 2026 – May 2026*
Gaining hands-on experience in frontend web development.

- Developing responsive and user-friendly web applications using HTML, CSS, and JavaScript while improving frontend functionality and user experience.
- Collaborating with team members on UI implementation, debugging, and enhancing website performance in a professional development environment.

CERTIFICATIONS

- ServiceNow CSA and CAD Certifications.
- NPTEL Elite Certifications in Programming in Java, AI in Human Resource Management, and NPTEL Elite+Silver Certification in Managerial Skills for Interpersonal Dynamics.
